Unusual Fire and Explosion Hazards Although non-combustible, contact with moisture or water may generate sufficient heat to ignite adjacent combustible materials. Contact with certain chemicals and metals generate, flammable hydrogen gas. Use positive pressure, self-contained breathing apparatus. HIGHLY CORROSIVE.

Threshold Limit Value
Ceiling limit 2mg/m³

Effects of Overexposure Extremely corrosive to all body tissue. Contact will cause severe burns and frequently deep ulceration. Eye contact will produce severe and painful injury. Inhalation of mist will cause irritation and may even cause damage to entire respiratory tract.

Emergency First Aid Procedures EYE CONTACT: Flush with excess water including under eyelids. SPEED IN FLUSHING IS IMPORTANT. SKIN CONTACT: Remove contaminated clothing under shower, flush with excess of water. Call physician. INGESTION: DO NOT INDUCE VOMITING. DRINK WATER OR MILK then neutralize with vinegar, call physician. INHALATION: Remove from exposure, call physician
